Abstract

This article analyzes the main factors influencing the formation and development of a teacher's pedagogical skills. The importance of a teacher's professional competence, skills in using innovative pedagogical technologies, and continuous professional development in the modern education system is highlighted. It is also emphasized that the exchange of experience, work on oneself, and the use of modern educational methods are important factors in improving pedagogical skills.

Keywords: pedagogical skills, teacher competence, educational process, innovative pedagogical technologies, professional development.

Introduction

The development of the education system largely depends on the professional skills and pedagogical competence of the teacher. In modern society, a teacher is considered not only a person who gives knowledge, but also a person who guides the personal development of students and teaches them to think independently. Therefore, the development of pedagogical skills is one of the most important tasks of the education system today.

Pedagogical skills are the ability of a teacher to effectively organize his professional activities, manage the learning process of students and develop creative thinking in them. The pedagogical skills of a teacher are closely related to

his level of knowledge, experience, methodological preparation and personal qualities.

The concept of pedagogical skills

Pedagogical skills are the ability of a teacher to effectively organize the educational process, correctly select teaching methods and establish effective communication with students. It is manifested as a set of professional knowledge, pedagogical experience and personal qualities of the teacher.

Pedagogical skills include the following components:

• pedagogical knowledge and skills;

• communicative abilities;

• pedagogical techniques;

• creative approach;

• the ability to effectively organize the educational process.

A teacher with a highly developed pedagogical skills is able to arouse the interest of students, encourage them to think independently and increase the effectiveness of the educational process.

Factors for developing a teacher's pedagogical skills

1. Improving professional knowledge and skills

A teacher must constantly update his knowledge and skills. New pedagogical technologies, methods and approaches are emerging in the modern education system. Therefore, a teacher must actively participate in advanced training courses, seminars and trainings.

2. Using innovative pedagogical technologies

Today, the use of interactive methods, information and communication technologies and digital educational platforms in the educational process is important. Innovative technologies help to organize the learning process in an interesting and effective way.

3. Exchange of pedagogical experience

Exchange of experience between teachers is one of the important factors in developing pedagogical skills. Teachers can share their experience through seminars, conferences and methodological meetings.

4. Work on oneself

Independent learning plays an important role in improving a teacher's pedagogical skills. Studying scientific literature, writing scientific articles, and engaging in research work contribute to the teacher's professional development.

5. Culture of pedagogical communication

Effective communication between teachers and students is one of the important factors in the educational process. During the communication process, the teacher must listen to the opinions of students, support them, and encourage them

The importance of developing pedagogical skills

Developing a teacher's pedagogical skills helps to improve the quality of the education system. A teacher with pedagogical skills:

• increases students' interest in learning;

• effectively organizes the educational process;

• develops students' creative and critical thinking;

• effectively uses modern teaching methods.

As a result, the level of knowledge of students and the quality of education increase.

Conclusion

In conclusion, the teacher's pedagogical skills are one of the important factors determining the effectiveness of the educational process. To develop pedagogical skills, a teacher must constantly work on himself, learn new pedagogical technologies, and increase his professional experience. In the modern education

system, it is important to support the professional development of teachers, improve the system of advanced training, and widely introduce innovative pedagogical approaches.
