EASY WAYS OF TEACHING ENGLISH TO CHILDREN

Student;Umarjanova Gulchiroy

Abstract

Nowadays, teaching English to children is very important .I think children can learn languages faster than adults ,but they need simple and interesting methods.In this article,I want to talk about some easy ways of teaching English to young learners.These methods include games,songs ,pictures and speaking activities.If teachers use these methods ,children can enjoy learning and understand English better.

Key words

Young learners ,English ,games, songs easy methods , motivation learning.

Introduction

Today English is one of the most popular languages in the world.Many parents want their children to learn English from an early age.But teaching children is not always easy.They get bored quickly and cannot focus for a long time.

From my point of view ,teachers should not use difficult grammar rules at the beginning.Instead ,they should make lessons fun and simple.When children enjoy the lesson ,they learn faster and remember more.

Main part

Learning through games

In my opinion ,games are the best way to teach children.When children play ,they do not feel like ‘Guess the word’ or ‘Simon says’are very useful .These games help children learn new words and also improve their listening.Ihave seen that students become more active when games are used.

Using songs and rhymtms

Songs are also very helpful.Children like music ,so they enjoy learning thorough

songs.When they listen and repeat songs ,they remember words easily.

For example ,alphabet songs or simple action songs are very effective.I think songs are very effective .Ithink songs also help pronunciation.

Using pictures and flashcards

Pictures are very important in teaching young learners.Children understand pictures faster than words.For example if a teacher shows a picture of a dog and says ‘dog’ children can remember it quickly.

Flashcards are also easy to use and make lessons more interesting .

Simple speaking activities

Teachers should give children a chance .Even small questions like what is your name or how old are you are useful.

Sometimes students are shy ,but with practice they feel more confident.Pair work activities can also help them speak more .

Repetition is important

Children forget quickly so repetition is necessaryTeachers should repeat words and activities many times.But it should not be boring .For example the same words can be practiced thourh games,songs small exercise.

Motivation and support

Ithink motivation is very important .Teachers should always support students and say good words like GOOD JOB or WELL DONE.When they feel confident they want to learn more.

Conclusion

In my opinion ,the most important things is too make children enjoy the lesson.If they enjoy learning they will learn English faster and better.TEACHING Engklish to children should be simple and interesting.Games ,songs picures and speaking activities cn help too
